

A Look at the Essentials
Mobile Patient Table
X Mobil

Open patient access via the table surface, which is open on one side, and user-friendly ergonomic handling

The instinctive guidance is carried out by means of color coded keys.

Our mobile X-ray tables are a perfect complement to the digital X-ray system "X Twin".

X Mobil Mobile and versatile

The patient table "X Mobil" sets a new standard of quality, characterized by the highest degree of mobility and the simplest handling. The floating table surface allows effortless adjustment and precise positioning. Sensitive electric motors ensure smooth and easy movement. A mechanical table-wheel braking system, and an electrical table surface brake, support the movement and simultaneously make control of the table even easier and more comfortable.

The X Mobil is powered by batteries and thus avoids bothersome electrical cords. X Mobil is especially appropriate for use in radiology and cardiology surgery.

X Mobil Q Smooth-running and exact

The "X Mobil Q" table, with its fixed table height, is extraordinarily easy to move and can be effortlessly adjusted to the exposure position. The melamine table surface provides a high degree of radiation transparency.

This is a table which impresses with high mobility, ergonomic control and high-tech materials.

Accessories

In order to make working with our mobile table even more convenient and effective, we offer you a selection of various accessories. Our accessories can be quickly assembled and put into immediate use.
